Professional Summary

A self-taught front-end web developer with two years of coding experience and a passion for responsive website design. I am a team player, a quick learner, flexible, and ready to work with a team of designers and developers.

Technologies

- JavaScript, React, HTML, CSS, Responsive UI Design
- Git, npm, Visual Studio, Chrome Developer Tools, Figma

Work Experience/Projects

Overweight Financials: Frontend Developer [website](#) June 2021 - Present

- React, Node Express.js, SendGrid, Postgres, and Material UI
- Overweight Financials is a portfolio management and budgeting solution that I am building and designing from the ground up with another partner developer.
- Currently we have the coming soon page deployed which I created as well as the backend email service that will handle communication with our user base.

Portfolio: [GitHub](#) | [Demo](#)

- HTML, CSS and JavaScript
- Built a responsive portfolio website that ties together my different projects in a single cohesive design to help demonstrate my skills as a developer.

Random Quote Machine: [GitHub](#) | [Demo](#)

- Javascript, React, HTML, CSS, and API
- Fetches a new random quote with the click of a button by leveraging data from an external API.

Todo List: [GitHub](#) | [Demo](#)

- React, TypeScript, HTML, and CSS
- Users can add, edit, delete and mark todo list items as complete.

Travel Form: [GitHub](#) | [Demo](#)

- HTML, CSS
- Created a responsive UI survey form to collect information from travelers and customers for a travel agency.

Education

The Odin Project/Udemy.com Online 2021 - Present

- Web Development Courses

Thai Programmers in USA 2020 - Present

- Member of a coding club where we study algorithms and share best practices for various development languages.

FreeCodeCamp Online 2019 - 2021

- Responsive Web Design
- Front End Development Libraries
- JavaScript Algorithms and Data Structures

Kasetsart University, Bangkok, Thailand 2010 - 2014

Bachelor of Political Science in International Relations
