Work Experience

Frontend Developer **Mindera** | Custom Software Development February 2022 - Present

- Developing and implementing A/B experiments for desktop and mobile web to improve user experiences, conversion rates, and key business metrics.
- Working with designers to build components that meet the clients design aspect. using JavaScript, React, HTML, and CSS to create responsive and visually appealing user interfaces, ensuring cross-browser compatibility and optimal performance.
- Actively participating in code reviews, providing constructive feedback and ensuring code quality and best practices.
- Working in an Agile development environment, participating in daily stand-ups, sprint planning, and retrospectives.
- Participated in an intensive and comprehensive GoLang Upskill training program facilitated by Mindera Academy. In this training program, I have learnt a lot of new skills and tools such as GoLang, PostgreSQL and Docker.

Frontend Developer **Overweight Financials** | [Website](#) June 2021 – January 2022

- Worked with another partner developer building a budgeting and investment portfolio management website.
- The frontend is a single-page application design using React and Material-UI with the goal of having a very fluid, customizable and modern feel.
- Created and deployed a coming soon page, as well as a Node Express backend email service that handles communication with the user base.
- Integrated third-party APIs such as SendGrid to enhance communication and functionality.

Intern Frontend Developer **Chim Media** | Digital Agency Company May 2021- Jul 2021

- Responsible for building and developing web applications and mocking website templates.
- Leveraged React to architect SPA templates, based on atomic reusable components as a design principle to create scalable, performant front-end applications with a pure javascript library.

Personal Projects

Portfolio [GitHub](#) | [Website](#)

- A responsive portfolio website that ties together my different projects in a single cohesive design to help demonstrate my skills as a developer. Use this as a personal sandbox to learn new technologies

Education

freeCodeCamp/online courses 2019 – Present

Front End Development Libraries

Responsive Web Design

JavaScript Algorithm and Data Structures

Bachelor of Political Science in International Relations | Kasetsart University Graduation: May 2014
